Evan Zheng

✉ evan.ty.zheng@gmail.com ⌂ evanzheng.com ○ github.com/evtyz in linkedin.com/in/evtyz

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C#, VBScript, C, HTML, CSS
Technologies: React.js, Node.js, ASP.NET, SQL Server, Maven, Gradle, Android, Git, Firebase, NumPy, Bootstrap

Experience

Ivy Global Education   *Toronto, ON*
Software Engineering Intern   *May 2021 - Present*
- Improved performance, mobile responsiveness, and SEO ranking of 120+ ASP.NET/C# pages with 200,000+ total monthly views
- Developed a SQL Server cleanup script that optimized tables with almost 9,000,000 entries, reducing size by 95%
- Designed and built classroom administration and analytics tools that manage 1,000+ students across the US and Canada
- Integrated test-taking platforms with classroom organization services, allowing instructors to administer exams virtually

Loo Labs   *Waterloo, ON*
Frontend Developer   *May 2021 - Present*
- Worked with a partner to plan, implement, and test the entire frontend of Waterpark, a Node.js web app that helps Waterloo students discover and review on-campus amenities
- Used React.js and TypeScript to build a responsive UI for browsing amenities, reading comments, and submitting reviews

Projects

Shapevolve
evanzheng.com/Shapevolve
- Published a Python 3 library that recreates artworks with circles using a genetic algorithm
- Used NumPy, OpenCV, and Python multiprocessing libraries to improve efficiency by 2x over other implementations
- Prototyped on Jupyter Notebooks, packaged using PyInstaller, and released on PyPI

Three-Body Simulation
evanzheng.com/threebodysimulation
- Developed a JavaFX desktop app to computationally simulate the three-body problem in orbital mechanics
- Optimized app performance and fixed several concurrency issues to ensure the simulation was responsive in real-time
- Packaged into a native Windows app using GraalVM and a cross-platform JAR file using Apache Shade and Launch4J
- Used Maven build tools and Apache Commons Math and CSV libraries, as well as Bootstrap CSS styling

BiblioBarcode
evanzheng.com/BiblioBarcode
- Built an Android app that scans photos of book barcodes to create a bibliography stored on a SQLite database
- Written using Java and SQL on Android Studio, with Gradle build tools
- Utilized the Google Books API and the Google Mobile Vision Barcode API, among others

Awards

Top 100, Canadian Mathematical Olympiad   *March 2021*

Distinction, Top 10%, Canadian Computing Competition (Senior Division)   *February 2021*

Gold Division, USA Computing Olympiad   *March 2020*

Education

University of Waterloo   *Waterloo, ON*
Bachelor of Computer Science (Co-op)   *September 2021 - Present*
